 Extension

2019 Ag Seminar - Beef School

9:00 am

Registration and Pre-event 'Wake-up' Social - Register and wake up with a cookie, coffee, tea, or juice. Visit with your neighbors and our distinguished panel of presenters.

9:30 am

Importance of Producing Quality Beef - Jim Church University of Idaho Extension Educator, Animal Science will look at how carcasses are quality and yield graded, how carcasses are priced, what this means to beef cattle producers, and how producers can meet industry quality targets.

What's new with Expected Progeny Differences (EPD's) - Jim

Church will discuss how beef cattle breeds have developed several new EPD's for various traits. This presentation will provide an overview of the new EPD's and how producers can use them in a selection program.

Spring Planted Forage Trial Results - Jim Church will also discuss results from a spring planted forage trial conducted in North Central Idaho. Thirteen different species and or combination of species were planted, harvested with yield data collected along with forage quality data to analyze production potential for livestock producers.

12:00 pm

"Beef it's what's for...." Lunch !

1:00 pm

Trace Minerals - Chip Gasser, Technical Representative from Multimin USA will discuss trace minerals and their function in the immune system, reproduction, and overall cattle health.

In compliance with the Americans with Disabilities Act of 1990, those requesting reasonable accommodations need to contact Kate Painter at the UI Boundary County Extension (208) 267-3235 at least one week prior to this program.
